

New DDC Online Modules

Drive
SAFE

These Online Modules provide the flexibility to train your employees with the full module library providing a comprehensive safe driving program or select individual topics based on specific training needs and corporate policies. Customize your organizations driver safety program based on your corporate training schedule, employee driving behavior, and motor vehicle incident rates.

The modules are approximately 20 minutes and feature:

- High quality video, 3D animation and illustrations
- Intuitive navigation and convenient bookmarking
- Full-course narration and closed-captioning
- High level interactivity and exercises to maximize learner's involvement
- Final quiz to improve retention and verify learning objectives
- Printable certificate after successfully completing course

What Employees Learn:

- Defensive driving techniques to reduce the chance of collision
- Strategies to change risky driving behaviors and attitudes
- Collision preventions through hazard recognition and application of collision avoidance techniques

Choose from these modules:

- ▶ Speed Management
- ▶ Lane Management
- ▶ Avoiding Collisions with Fixed Objects
- ▶ Avoiding Impaired Driving
- ▶ Avoiding Fatigued Driving
- ▶ Avoiding Aggressive Driving
- ▶ Intersections
- ▶ Weather and Road Conditions
- ▶ Backing and Parking Lot Strategies
- ▶ **See reverse side for module descriptions and pricing structure.**

New DDC Online Modules

Modules Available

- **Speed Management**
Provides the knowledge to manage driving speed in the most common driving conditions and situations
- **Lane Management**
Provides drivers the knowledge to use traffic lanes properly and safe-driving techniques to prevent lane-related collisions
- **Avoiding Collisions with Fixed Objects**
For public utility and service industry vehicles, identifies why drivers collide with fixed objects, and offers safety practices and driving techniques that can eliminate these preventable collisions
- **Avoiding Impaired Driving**
Teaches practical, common sense techniques to avoid reckless impaired drivers on our highways
- **Avoiding Fatigued Driving**
Learn the warning signs of drowsy driving and how to change your sleeping habits and decisions to help ensure the safety and health of your driver
- **Avoiding Aggressive Driving**
Learn how to avoid aggressive drivers and keep from becoming an aggressive driver in stressful situations
- **Intersections**
Analyzes the reasons why drivers collide at intersections, and offers defensive driving procedures to avoid these deadly crashes
- **Weather and Road Conditions**
Helps prepare drivers for the worst driving conditions by teaching proper defensive driving techniques in real-life scenarios
- **Backing and Parking Lot Strategies**
Offers safe driving techniques to help drivers avoid these preventable collisions in multiple backing and parking conditions and situations
